Table of contents

01 ~~Problematic~~

02 Our work

03 Demonstration of the tool

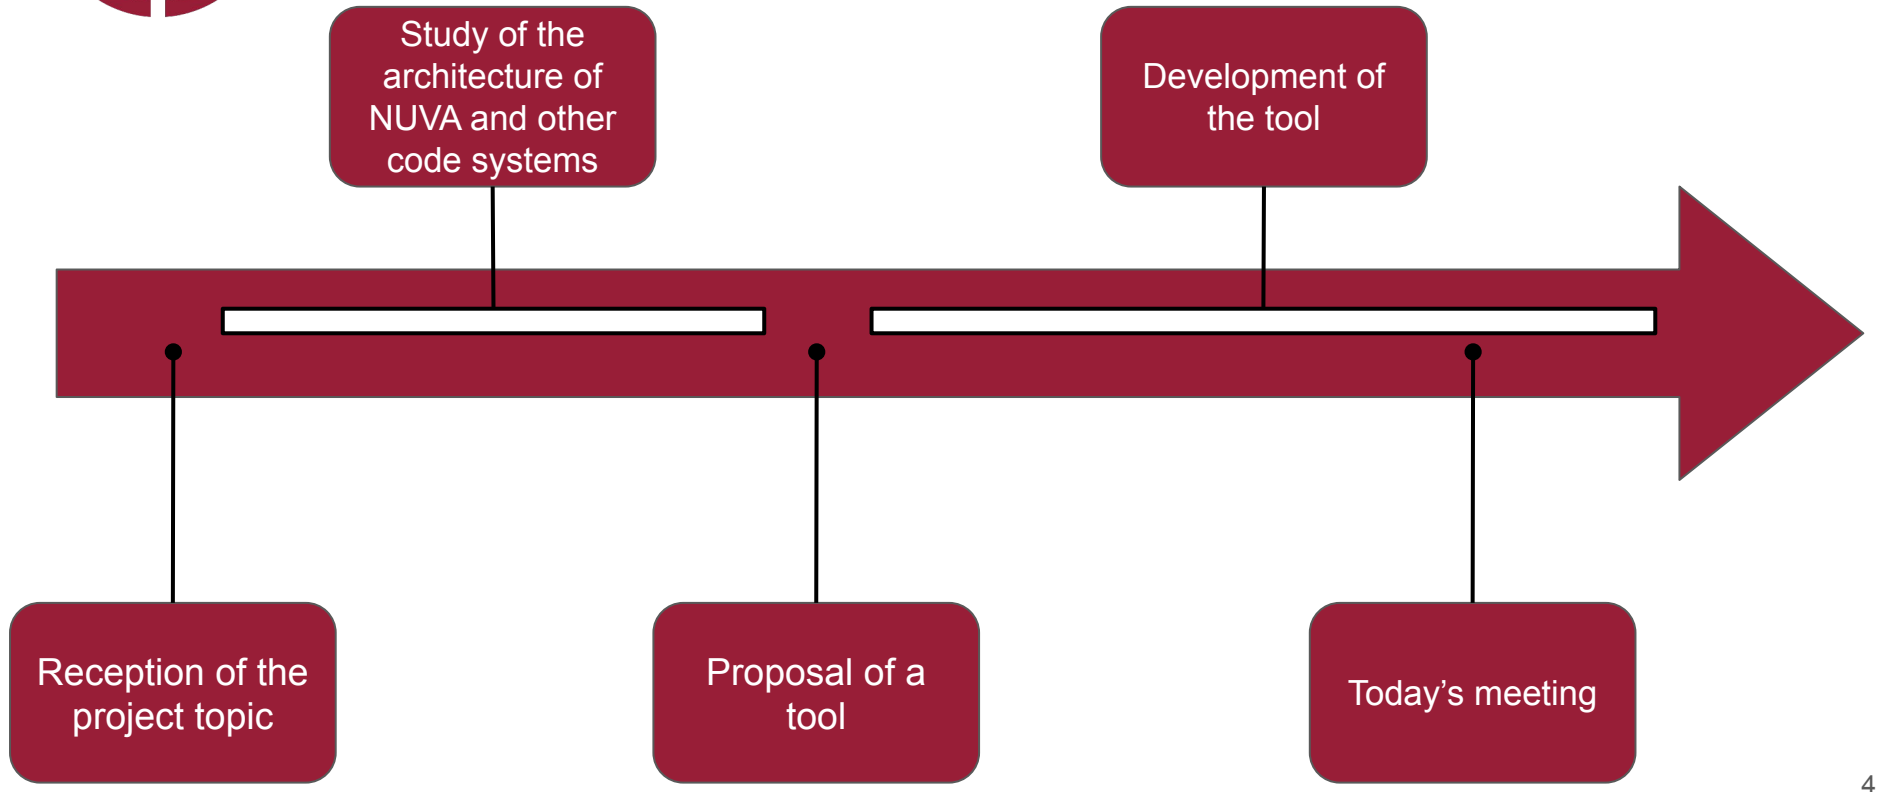

04 ~~Feedbacks~~

01 Problematic

Each country has its own coding system for vaccines → Translating vaccination histories is complex

How can we help solve these problems while leveraging NUVA ?

02 Our work

Study of the architecture of NUVA and other code systems
Development of the tool
Reception of the project topic
Proposal of a tool
Today's meeting

03 Demonstration of the tool

04 Feedbacks

Upcoming features planned :

- **Feedback system for the tool itself**
- **Feedback system for the description sheet**
- **Taking into account country filters (for AI and code layout)**

Do you have any suggestions about our tool ?

(features to add, to remove, to change, …)

Thank you for your attention !
